

Hot dip galvanized liftable storage boxes

Product information

We introduce our galvanized toolboxes, a robust and durable solution for the safe transportation and storage of tools in various work environments.

These boxes are carefully designed to offer a combination of strength, corrosion protection, and ease of use.

Strength and Durability: The boxes are constructed with high-quality materials to ensure strength and durability, withstanding daily wear and the demands of construction site work.

Corrosion Protection: The galvanized finish provides effective protection against corrosion, preserving the structural integrity of the box even in more aggressive environments.

Side Handles and Lifting Brackets: Side handles allow for easy manual movement, lifting brackets at the base facilitate transport with forklifts, and side hooks enable lifting with four-leg chains and cranes.

Protection: The construction of the boxes ensures that tools inside are protected from adverse weather conditions.

Lockable: Option to secure with a padlock to ensure the safety of tools during transport and storage. (not included in delivery)
